

HOW THE ENVI SYSTEM WORKS

The **ENVI System** uses a 4-stage design to produce the highest quality water for your entire home:

- **Sediment Filtration:** Screens out dirt, debris, and large particles
- **Carbon Multimedia Filtration:** Removes chlorine and organic contaminants
- **Membrane Purification:** Removes hard water and up to 98% of dissolved salts and metals
- **Ozone Disinfection:** Pure water is kept safe with nature's powerful disinfectant

ADVANCED MEMBRANE TECHNOLOGY

Patented GE™
Membrane
Technology

removes up to 98% of substances like arsenic and lead—even particles 1,000th the width of a human hair! Unlike conventional Reverse Osmosis membranes, they can reduce hardness without plugging up with scale. The **ENVI System** can operate on standard water pressure with up to 19x less waste water than undersink Reverse Osmosis systems.

ABOUT ENVI

The **ENVI System** is based on over 25 years of membrane purification research and development. The world headquarters, testing, manufacturing, and assembly are owned and operated in Rogers, MN.

*A Revolutionary,
Environmentally Smart System
Providing Bottled
Quality Water Throughout
Your Home*

Experience the ENVI Difference

Enjoy purified water for your home and family. Protect plumbing and appliances from hard water and sediment damage. You get sparkling glassware, softer laundry and fresh "bottled water quality" drinking water at every faucet in your home.

Water softeners are effective against hardness, but they add sodium to drinking water in the process, and chloride to the drain water. Carbon filters can remove chlorine and improve taste, but do little to protect against 90% of the total dissolved solids (TDS) in the water.

The **ENVI System** is an environmentally friendly innovation that doesn't add ANY salt or chemicals to your water or the environment. This modern solution provides complete protection from problems like:

- Arsenic V
- Silica
- Cadmium
- Chlorine & Chloramines
- Copper
- Fluoride
- Hard Water
- Lead
- Nitrates
- Pharmaceuticals
- Sediment
- TDS

ENVI SYSTEM OPTIONS

EI 700

VT 700

EI SYSTEM	SPECIFICATION	VT SYSTEM
700-1400 GPD	Daily Output	700-2100 GPD
3 Valve Manual	Bypass	Automatic
90-94%	TDS Rejection	90-94%
Up to 20 GPM	Service Flow Rate	Up to 20 GPM
12" D x 24" W	Dimensions	24"D x 24"W
6 Month (avg)	Sediment Filter	6 Month (avg)
2-3 Years (avg)	RO Membrane	2-3 Years (avg)
15 amp	Energy Consumption	15 amp
100,200,300 gal	Storage Tank	100,200,300 gal
